
OPERATION VIKING RAID

SITUATION

ENEMY FORCES

The enemy have concentrated troops to the coast to take control over the civil unrest. Due to bad weather in the area our SIGINT have very little information on enemy troop movements the last weeks but our HUMINT resources indicates that the enemy have stationed several SAM sites along the coast. HUMINT reports that even if a civil war is closing in the government still has a strong support from the population

FRIENDLY FORCES

The enemy air defenses must be destroyed to secure air superiority when the invasion starts. Intel is also needed, mainly enemy strength, troop movements, equipment and readiness levels. Local resistance forces are limited in strength but have a high motivation. When you take contact with them they will guide you to your target. Support during the mission is Swedish navy's corvette HMS Visby which has moved in close to the coast. The vessel will be your Base Of Operation.

MISSION

MISSION

Your mission is to infiltrate Chernarus and make contact with the local resistance; they will give you information of the enemy's air defense sites. You will proceed with destroying these sites to give our planes a safe corridor in to Chernarus airspace. During the mission you will recon the enemy's positions to fill the Intel gap from the bad weather situation.

EXECUTION

COMMANDERS INTENT

This will be a hit'n run operation. Infiltrate the AO, make contact with local resistance, take out the air defenses, exfiltrate back to supporting vessel.

CONCEPT OF OPERATION

This is a low profile operation, avoid enemy contact if possible. CO have mandate to decide if force must be used to safely take the objective

TASKS

1. Infiltrate AO using Strb 90.
2. Meet with local resistance.
3. Destroy airdefences.
4. Recon enemy, bring back all Intel you find.
5. Exfiltrate back to the base of operation. Gentlemen, God luck!

ADMINISTRATION & LOGISTICS

ADMINISTRATION

You will be operating in hostile area. No CASEVAC is possible during the mission.

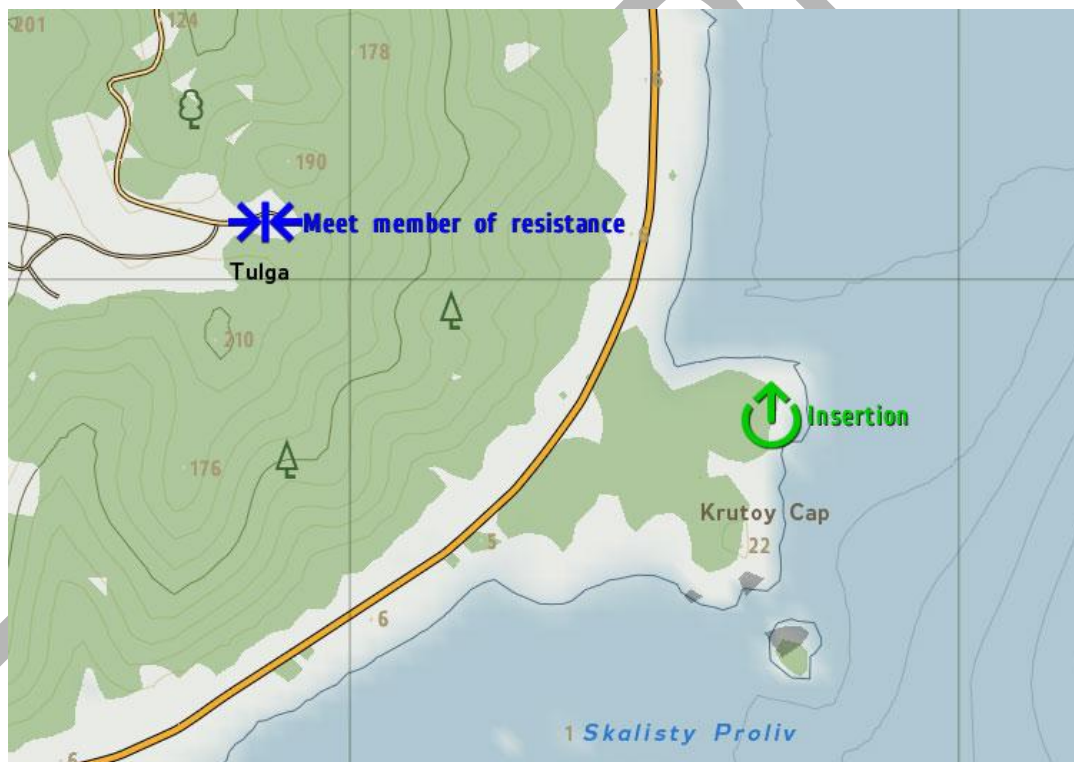

LOGISTICS

Squad codename: Viking One

Comms equipment: Radio 180

Insertion and extraction by Strb 90

ATTACHMENTS

Area of operations
