Rapid Deployment Operation Urgent Fury

Background:

The US army intended to withdraw its troop out of Takistan but recently there been increased insurgency activities. The Swedish government decided yesterday to aid the American effort by sending the rapid deployment unit. The population has in general turned against the Americans after millions of profits from the oil industry still haven't improved the living conditions of the common man. The government is very weak and many soldiers are deserting from the army while the police force in many regions is more lojal to the insurgents.

Mission:

Your unit consists of 20 men and 4 Ptgb 6 which will be airlifted to Takistan's north airfield. Upon arrival you should get in contact with the local commander that will give you the briefing. Strf 90C is being transported over sea and expected to arrive in 1-2 months.

Enemy:

The uprising started a few months with an increase in terror bombings but during the last days the Americans have been in several gunfights was the insurgents don't seem to retreat despite outnumbered. Heavier and more modern weapons have been noticed.

Friendly forces:

Your platoon is expected to solve its tasks independently however you will always have artillery support and in case of wounded you are assigned to the US field hospital.
