Rapid Deployment

Operation Urgent Fury – Hearts and mind

Background:

The intense fighting in Nagara has taken us all by surprise. Papa Whisky had several wounded and after withdrawing from the AO the armored cars took small fires on the way home. To provide the soldiers with better protection and higher accesses to medical care two Patgb 203 will be airlifted down this week. One will be a ambulance version. The eastern area of Takistan has been peaceful for a long time but due to the recent uprising in the western part of Takistan it can't be guaranteed that this is the case today.

Mission:

Command wants to survey the feelings of the villages, try to establish contact in as many places as always and gather as much intel as possible. The following locations should be visited; *Bastam*, *Imarat*, *Zavarak* and *Karachinar*. Karachinar consists of two parts, in northern Karachinar they are expecting a meeting at 14.00, local manners means you should arrive around 14.30. In the other locations no meetings have been prearranged. Papa whisky is authorized to engage and counter attack enemy, with that said this is still a hearts and mind operation and the people should be respected.

Enemy:

The eastern area have been peaceful and no incidents been reported last six months however things are changing fast and little is known what to expect.

Friendly forces:

Papa Whisky has been assigned an interpreter. Artillery supports is available as always but take care to avoid collateral damage. The skeldar UAV received huge amount damage over Nagara and no spare parts are available so there is no UAV support this time. In case of wounded you are assigned to the US field hospital located at the base.
